Summary

B.Tech Computer Science student graduating in 2027 with hands-on experience in Python, SQL, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), dashboard development, and translating data into actionable business insights. Passionate about solving real-world business problems through data, with strong analytical thinking, collaboration, and continuous learning.

Education

KL University, Andhra Pradesh

B.Tech in Computer Science and Engineering

2023–2027

CGPA: 8.67

Skills

Programming Languages: SQL, Python, C++, C

Data Analytics: Excel, Power BI, Pandas, NumPy, Data Cleaning, Data Visualization, EDA, Dashboarding, Statistics

Database: MySQL, SQL

Generative AI: ChatGPT, Prompt Engineering

Tools: Google Workspace (Docs, Sheets), Git, GitHub, VS Code, Postman

Relevant Coursework

Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Probability & Statistics, Data Analytics

Projects

HR Analytics Dashboard

SQL, Excel, Power BI

- Processed and analyzed 10,000+ employee records using SQL and Excel to identify attrition trends and workforce insights.
- Built an interactive Power BI dashboard featuring employee count, attrition rate, department performance, salary analysis, and hiring trends.
- Performed data cleaning, transformation, and KPI calculations to improve reporting accuracy and support business decisions.
- Created interactive dashboards enabling stakeholders to monitor workforce KPIs and make informed business decisions.

Sales Analytics Dashboard

Python, SQL, Power BI

- Analyzed sales data using Python (Pandas) and SQL to identify revenue, profit, and customer purchasing trends.
- Performed data cleaning, transformation, and exploratory data analysis to improve data quality and generate business insights.
- Built an interactive Power BI dashboard featuring KPIs, sales trends, regional performance, and product-wise analysis.
- Identified sales patterns and provided data-driven recommendations to improve regional performance and product profitability.

Achievements

- Solved 200+ coding problems on LeetCode and CodeChef.
- Participated in Guidewire Hackathon and collaborated on innovative software solutions.
- Built and published end-to-end analytics projects demonstrating data extraction, cleaning, visualization, and business insight generation.

Relevant Experience

Code4Change Hackathon – Organizer (2025)

- Managed participant registration and attendance data using spreadsheets, ensuring data accuracy.
- Organized structured datasets to support participant tracking and event operations.
- Collaborated with the organizing team to prepare reports and coordinate evaluations.
